| Research Area | 1. Vibration and noise control 2. Prosthetics and transducers for biomedical applications | | | |
| <p>Brief introduction of your research experience:</p> <p>Prof. Houguang Liu received the Ph.D. degree in mechanical engineering from Shanghai Jiaotong University, P. R. China, in 2011. He is currently a professor in mechanical engineering of China University of Mining and Technology, P. R. China. He ever worked at the University of Cambridge, United Kingdom as a postdoctoral research fellow.</p> <p>His research interests include vibration and noise control, prosthetics and transducers for biomedical applications, mechanical signal analysis and processing. He completed more than 20 research projects and engineering consulting, including 3 national natural science funds. He has obtained 21 patents, and published 80 papers in peer-reviewed journals including Nonlinear Dynamics, Mechanical Systems and Signal Processing, Journal of the Acoustical Society of America.</p> | | | | |
